SUMMARY

Final-year AI & Data Science student with full stack development experience building production-grade web applications and Distributed Systems. Built Code-Share, a collaborative IDE with real-time editing, decoupled Node.js/FastAPI microservices, AI code analysis, and AWS S3 integration, backed by Docker, Kubernetes, and Git / CI-CD workflows. Skilled across Python, Data Structures and Algorithms, Redis, and cloud deployment, with a strong grasp of system design and performance optimization.

TECHNICAL SKILLS

Languages & Core	Python
Backend	FastAPI
DevOps & Cloud	Docker, Kubernetes, AWS, Github Actions / CI-CD workflows, ArgoCD, Linux
AWS	S3, EC2, Lambda, IAM, ECR, RDS
Databases	MySQL
Tools	Git, GitHub, Prometheus, Grafana

INTERNSHIP

Deep Learning & Full Stack Intern

Dec 2025 – Feb 2026

AI Leela (OM Intelligence)

Python · Flask · MySQL · Docker

- ▶ Engineered modular **Flask** backend structured with **Blueprints** and **SQLAlchemy** ORM on **MySQL 8.0**, modeling doctors, patients, and visit state machines with relational foreign keys and dynamic JSON attributes.
- ▶ Built LLM triage pipeline using **LangChain** & **Gemini 2.5 Flash-Lite**, transforming unstructured patient complaint text into structured JSON triage schemas with automated severity flagging and zero-downtime offline fallback logic.
- ▶ Implemented dual-method authentication & containerization via **Google OAuth2** (SSO) with automatic profile merging and local credential hashing; containerized full-stack services using **Docker** & **Docker Compose** for reproducible production deployments.

LEADERSHIP

Open Source Lead

Sept 2025 – July 2026

Google Developer Group on Campus, Nashik

- ▶ Organized **5+ workshops** and agile sessions for a **300+ member community**; mentored **40+ students** on Git / CI-CD workflows, cloud tools, and full-stack development across collaborative projects.

PROJECTS

CodeShare — Real-Time Collaborative IDE & Secure File Workspace

codesharre.vercel.app

FastAPI · Socket.IO · Node.js · Redis · AWS S3 (Filebase) · Docker · Kubernetes · ArgoCD · GitHub Actions

Feb 2026

- ▶ Engineered a collaborative IDE decoupling a **Node.js** WebSocket gateway from an async **FastAPI** worker; built an in-browser preview pipeline streaming converted documents via headless **LibreOffice** and integrated **Groq AI** for automated vulnerability scans cached in **Redis (1h TTL)**.
- ▶ Architected **S3 pre-signed direct uploads** (0B through server); containerized services using **multi-stage Docker builds** and orchestrated on **Kubernetes** with **HPA** scaling replicas from **2 to 5** under high CPU loads.
- ▶ Established an automated **GitHub Actions CI** pipeline with **Trivy** vulnerability scanning and pull-based **ArgoCD GitOps** deployment; instrumented **prom-client** with **Prometheus ServiceMonitors** and **Grafana** dashboards for real-time cluster observability.

DaeMon — Containerized Distributed Compute Grid for Volunteer Hardware Aggregation

github.com/Gaurravvvv/Daemon

FastAPI · RabbitMQ · MinIO (S3) · Docker · MongoDB · Redis · CuPy (CUDA) · Python

May 2026

- ▶ Engineered an asynchronous **FastAPI** orchestrator that stores heavy multi-gigabyte payloads in **MinIO (S3)** to prevent broker bottlenecks. Developed a dynamic Task Splitter that divides monolithic datasets into parallel micro-tasks dispatched to dedicated **RabbitMQ** queue pools.
- ▶ Created a containerized **Python daemon** that allows volunteers to join the grid via a single **docker run** command. Features automatic hardware probing (**NVIDIA CUDA via CuPy**) and strict compute filtering (**gpu_only** vs. hybrid) for accelerated batch image processing.
- ▶ Implemented an event-logging pipeline delivering real-time terminal logs, worker heartbeats, and atomic progress updates to a **Next.js** dashboard. Automatically stitches and packages all completed chunk outputs into a downloadable **ZIP archive** upon **100%** completion.

ACHIEVEMENTS & CERTIFICATIONS

Achievement **Winner** — GDG Nashik Hackathon (Crickathon) 2026

Certifications Linux LFS101 • Cloud Practitioner — GFG

EDUCATION

B.E , Artificial Intelligence & Data Science

Savitribai Phule Pune University

2023 – Present

CGPA: 8.71
